

Submit your Project Idea/Proposal (Individual or Group)

Use Gen AI, bring your PRD from Module 04 assignment + create a Technical Requirement Document/Spec for your project.

Submission: Submit a **txt file or word doc or pdf file** on **what your project is, how you are planning to do it, who is working with you (if it is a group project)** etc.

If you are looking for Group teammate from 2373 class, use the discussion forum to ask questions.

Goal: Simple enough for you to get a mental model on building the project.
